

Install & run in Codex

1. Install the skill

Open Codex and paste:

```
$skill-installer Install from  
https://github.com/davidwang95/x-account-backtest  
using path skills/x-account-backtest.  
Prepare its Python requirements.
```

2. Choose an account and period

Send this in your next message:

```
$x-account-backtest @jimcramer last 5 years
```

Replace the handle and period with your own.

3. Read the report

Get a PDF with hit rates, market comparisons and charts. Every scored view links to its original post. Codex needs access to historical posts and prices.

X Account Backtest

Backtest an account's
investment views.
See which calls were right.
